

RAHUL VERMA

✉ rahulkhverma0143@gmail.com 📍 Patna, Bihar, India

📄 SUMMARY

Computer Science and Engineering student specializing in Artificial Intelligence, interested in software development and backend engineering. I have built web applications using React, Next.js, Node.js, Express.js, FastAPI, PostgreSQL, and MongoDB, along with projects in machine learning and data analysis. Looking for an SDE / Software Engineering Internship.

🧠 SKILLS

Languages: C, C++, JavaScript, Python, SQL, TypeScript

Frontend: CSS, HTML, Next.js, React, Tailwind CSS

Backend: Express.js, FastAPI, Node.js, REST APIs

Databases: MongoDB, PostgreSQL

AI/ML: Data Analysis, Machine Learning, NLP, Sentiment Analysis

Core: Data Structures & Algorithms, OOP

Tools: Git, GitHub, VS Code

📜 CERTIFICATIONS

Summer Internship in Sentiment Analysis using Machine Learning: IIIT Bhagalpur
01/2026

Internship in Data Science using Python Programming: NIELIT Patna 01/2025

💼 EXPERIENCE

Machine Learning Intern, *Indian Institute of Information Technology, Bhagalpur (IIIT Bhagalpur)*
Bhagalpur

- Worked on a sentiment analysis project, handling text preprocessing and classification.
- Used Python and NLP techniques to prepare and analyze text data.

Data Science Intern, *National Institute of Electronics and Information Technology (NIELIT), Patna*
Patna

- Worked with Python for data cleaning, preprocessing, and exploratory data analysis.
- Used machine learning algorithms as part of different data science tasks.

🎓 EDUCATION

Bihar Engineering University, *B.Tech in Computer Science and Engineering Specialization in Artificial Intelligence*
01/2023 – Present | Patna
Minor in Computer Science and Engineering, Artificial Intelligence

📁 PROJECT

RailGaadi - Indian Railways Tracking Web App

- Built a real-time railway tracking app with Next.js, TypeScript, React, and Tailwind CSS, including live train status, route maps, delays, and ETA.
- Added MapLibre maps, React Query, Zustand, weather integration, and terrain/POI data for an interactive journey experience.

EduPilot - AI Study Platform

- Built a study platform with authentication, quizzes, study plans, document uploads, and AI tutoring.
- Created the backend with FastAPI and PostgreSQL, using SQLAlchemy, and deployed the application on Vercel and Render.

OceanEmbed - 3D Ocean Temperature Reconstruction

- Built a project for reconstructing 3D subsurface ocean temperature from surface ocean observations.
- Used Python for data processing, analysis, and visualization.
